HymerNova 580 SL - Caravan of the Year 2009 in England

Beauty which comes from within

Bad Waldsee, 11 November 2008

The HymerNova 580 SL was chosen Caravan of the Year 2009 in the category of "Best Interior Design" by the UK Which Caravan magazine.

In the reasons for its decision, the jury highlighted the use of three different materials in the furniture flaps and flooring design. The quality of the upholstery was praised as being the best and most comfortable ever tested by the jury. Thirdly, the entire lighting scheme was thought to be spectacular and exceptional, with special commendation going to the LED lighting under the overhead lockers.

The judges singled out the handy drawer system and the washroom design of the HymerNova 580 SL as particularly practical design features.

The jury remarked in conclusion that there are but few manufacturers industry-wide who succeed in combining a captivating interior design, which conjures up a remarkable atmosphere, with outright, customer-focused functionality.

This award cements that Hymer is right on track with its company philosophy of manufacturing its products at top quality level with contemporary design.

The Which Caravan trade magazine comes out monthly in England and enjoys a very good reputation in the caravanning industry. Over 40 caravan tests are published in every issue and due to the testers' expertise they have a strong bearing on readers' purchase decisions.

In Germany the HymerNova SL range encompasses nine models. The furnishing scheme makes use of a Toscana cherry wood furniture finish and flaps made of real

wood with leather-look inlays. The new generation of seating offers lavish upholstery providing maximum comfort. The fashionable curtain style and the complementary table and counter-top finish create a pleasing ambience. The interior of the caravan is well lit by spot lights and new ceiling lights. It is precisely these details which have led to the HymerNova 580 SL being chosen Caravan of the Year 2009 in the category of "Best Interior Design" in England.
